

# Medicaid Success™ Application Process

## HOW THE MEDICAID SUCCESS™ PROGRAM HELPS YOU

When you deplete resources and are unable to pay for care in a facility, Medicaid may be available to help pay the cost of care. Medicaid coverage for skilled nursing care is available in every state, but the spenddown rules vary and the application process can be rather complicated.

To help you with the Medicaid application process, your facility has enrolled in the Medicaid Success™ program. The goal of the program is to provide assistance with preparing, filing and processing your resident's Medicaid application. We coordinate with the family or legally responsible individual who has access to the resident's information so that we can expedite the Medicaid eligibility process and make things as easy for the resident as possible.

## HOW YOU HELP ENSURE YOUR MEDICAID SUCCESS™

There is no Medicaid assistance service that can do it all by themselves. Every Medicaid application requires providing the benefit agency with documentation to which only the resident or their family would have access. Medicaid requires verifying assets, income, transfers, citizenship, and a number of other personal items. Accuracy and timely accessibility to needed information is key to your Medicaid application's successful approval. Our team makes it easy and organized for you to assemble and submit the necessary verifications.

Medicaid Success™ is not a government agency. We are not responsible for approving any benefits.

## WHAT TO EXPECT FROM MEDICAID SUCCESS™

Once your resident's facility has made a Medicaid Success™ referral, your case will be assigned a Medicaid Eligibility Specialist who will be your primary point of contact. The specialist will reach out to you to gather additional information and provide you a list of documents necessary to complete the Medicaid application. You will work with your specialist hand-in-hand throughout the application process and your specialist will serve as the Authorized Representative on the file with the Medicaid department so you don't have to worry about dealing directly with them. **The specialist will work with you to get Medicaid approved as quickly as possible.**
